Location: Navi Mumbai, India

EDUCATION

Vishwaniketan's iMEET (University of Mumbai)

2022 – 2026

B.E. Computer Science & Engineering (Artificial Intelligence & Machine Learning)

CGPA: **7.80/10**

EXPERIENCE

Pravideon Pvt Ltd

Aug 2025 – Feb 2026

AI & Full Stack Engineering Intern

Navi Mumbai, India

- Developed and contributed to **Nirvagni F.L.A.M.E**, an AI-powered autonomous fire suppression and industrial safety platform designed for real-time threat detection and emergency response.
- Integrated AI-powered features and automation workflows to improve operational efficiency.
- Integrated **PLC controllers**, IoT devices, and cloud-based AI models to automate fire detection, alert generation, and suppression workflows.
- Developed real-time dashboards for sensor monitoring, incident tracking, and industrial safety reporting.

SKILLS

Languages: Python, JavaScript, SQL, C++

Frontend: React.js, Next.js, HTML5, CSS3, TailwindCSS, Bootstrap

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs **Databases:**

MongoDB, MySQL

AI/ML & Tools: Machine Learning, Deep Learning, Computer Vision, NLP, TensorFlow, Keras, OpenCV, LLMs, Generative AI, Pandas, NumPy, Power BI, Data Visualization

Development Tools: Git, GitHub, Docker, Linux

IoT: ESP32, Arduino, Embedded Systems, Sensor Integration

PROJECTS

Expansion.ai – AI-Powered Global Business Expansion Platform

AI-powered global business expansion platform integrating NLP, OpenAI APIs, Machine Learning, MongoDB, SQL, FastAPI, and React.js. Automated compliance document generation and regulatory analysis, reducing processing time by over 70%.

Smart Surveillance System for Real-Time Threat Detection

Developed an AI-based surveillance system using OpenCV, TensorFlow, and deep learning models to detect accidents, weapons, and suspicious activities from live CCTV feeds. Implemented automated evidence capture and real-time alert generation.

Multipurpose Notice Board

Built a centralized notice management platform using Flask and MongoDB to streamline communication between institutions and students through a secure and user-friendly interface.

Library Management System

Developed a desktop-based library management system using Python, Tkinter, and SQL to automate book issuance, returns, inventory tracking, and record management.

ACHIEVEMENTS

- National Level Gold Medalist – Kung Fu Championship.
- Lead Organizer – Hack2Crack 1.0 & 2.0.
- Vice President – SAAM Committee.
